About Us

Recycle Rewards is an exciting and eco-friendly program that will teach individuals how and what to recycle in exchange for fun prizes and rewards.

Here at Recycle Rewards, we believe that care for the environment is of the utmost importance, and that implementing an effective and enjoyable system will encourage others to do the same.

Thus, Recycle Rewards was born!

Recycle Rewards is a user-friendly, auto-updated program, which records the amount of recyclable items that have been dropped off in exchange for points.

Users can create a profile, collect recyclable material from their community, and with the use of their uniquely assigned ID number, drop-off at designated locations in exchange for points.

As points build, the user is able to redeem prizes and rewards, based on how many points have been earned. The result is a cleaner environment, a more dedicated and educated population concerning waste, and many exciting and fun prizes and rewards!
