SUMMARY:

Team successfully established the premise of project: to design and develop a program that will allow individuals and/or schools to participate in a recycling program in exchange for rewards. The team has agreed on this topic for the following reasons:
   o Program will address an real life issue (waste and pollution) that affects daily life

- Communities, schools, adults and children, and the environment at large will benefit from this program in terms of satisfaction through rewards, cleaner and more sustainable communities, and easily obtainable and fun goals that will educate the user about recycling
- Due to Canada's goal of 'greener' solutions both in industrial aspects and individual daily life, companies, organizations, and even the government may prove to have interest in this program

Team has completed and submitted a project proposal, detailing the project specifications and description, desired result, rules and entities, and software specification.

Completed Project Proposal presentation, received feedback and approval.
